

similar to weight: how much a thing weighs

Biomass: mass of an organism MINUS its water.

Cougar ← Snake ← Shrew ← Grasshopper ← Grass
total mass = 100Kg
Biomass = 30Kg because 70% of total was H₂O!

Numbers Pyramid: # of organism needed to support one top predator

- 1) What is your favorite food?
me: Salmon or bread
- 2) Write the food chain that fits best:
