

Soil Permiability & Texture

Name	Granular	Blocky	Palty
Picture!			
How Permiable?	High Perm.	Medium Permiability	Low Permiability
Example	Sand!	Silt	Clay

Permiability: How much a substance (water) can pass through. To allow water to move through.

Each plant species needs a specific combination of Sand, Silt & Clay.

- Some need High permiability
- Some need medium
- Some need low.
